Haan Duaa, ab tumhara HTML + CSS + Bootstrap complete hai, to ab LibraX ka next phase JavaScript aur Firebase hai. 👍

Main tumhe poore project ki overall files bata raha hoon, tumhari existing 3-member division ke according.

LibraX — Overall JavaScript + Firebase Files

1. JavaScript files

Tumhare project ke liye 12 JS files + 1 common Firebase config + 5 Firebase service files ka structure suitable hai.

📁 js/

js/

|

- └─ main.js
- └─ auth.js
- └─ dashboard.js
- └─ profile.js
- └─ books.js
- └─ members.js
- └─ membership.js
- └─ scanner.js
- └─ issue.js
- └─ return.js
- └─ reports.js
- └─ settings.js

Har file ka kaam

|
File

|
Functionality

|
| --- | --- |
|

main.js

|
Common website interactions, navbar, menu

|
|
auth.js

|

Login, Register, Logout, Forgot Password

|

|

dashboard.js

|

Statistics, counters, charts, activities

|

|

profile.js

|

Profile update, password change

|

|

books.js

|

Add, Edit, Delete, Search Books

|

|

members.js

|

Add, Edit, Delete, Search Members

|

|

membership.js

|

Digital ID Card, QR Code, Download, Print

|

|

scanner.js

|

Admin laptop camera QR Scanner

|

|

issue.js

|

Issue Book, availability check

|

|

return.js

|

Return Book, fine calculation

|

|

reports.js

|

Reports, charts, filters

|

|

settings.js

|

Appearance, notification preferences, language

|

Note: main.js optional hai. Agar common JavaScript ki zaroorat nahi hai, to isko skip kar sakte ho.

2. Firebase files

Firebase ke liye ek shared setup hoga. Har member apna alag Firebase project nahi banaye ga.

firebase/

firebase/

|

├── firebase-config.js

├── auth-service.js

├── books-service.js

├── members-service.js

├── borrow-service.js

└── notification-service.js

Firebase files ka kaam

|

File

|

Kaam

|

| --- | --- |

|

firebase-config.js

|

One Firebase project ki configuration

|

|

auth-service.js

|

Firebase Authentication

|
|

books-service.js

|

Books collection CRUD

|
|

members-service.js

|

Members collection CRUD

|
|

borrow-service.js

|

Issue, Return, Fine, Borrow Records

|
|

notification-service.js

|

Member notifications

|

Important

firebase-config.js sirf ek file hogi.

Lekin Firebase ki service files alag ho sakti hain taake team ka code organized rahe.

3. Complete folder structure

Tumhari existing HTML/CSS ko include karke:

LibraX/

- |
- | — index.html
- | — login.html
- | — register.html
- |
- | — admin/
 - | — dashboard.html
 - | — books.html
 - | — members.html
 - | — qr-scanner.html
 - | — issue-book.html
 - | — return-book.html
 - | — reports.html
 - | — settings.html
 - | — profile.html (optional)
- |
- | — member/
 - | — dashboard.html
 - | — my-books.html
 - | — membership-card.html
 - | — notifications.html
 - | — settings.html
 - | — profile.html (optional)
- |
- | — css/

- | | └─ style.css
- | | └─ dashboard.css
- | | └─ components.css
- | | └─ responsive.css
- |
- | └─ js/
 - | | └─ main.js
 - | | └─ auth.js
 - | | └─ dashboard.js
 - | | └─ profile.js
 - | | └─ books.js
 - | | └─ members.js
 - | | └─ membership.js
 - | | └─ scanner.js
 - | | └─ issue.js

 - | | └─ reports.js
 - | | └─ settings.js
- |
- | └─ firebase/
 - | | └─ firebase-config.js
 - | | └─ auth-service.js
 - | | └─ books-service.js
 - | | └─ members-service.js
 - | | └─ borrow-service.js

```
| └─ notification-service.js
|
| └─ assets/
|   └─ images/
|   └─ icons/
|   └─ avatars/
|
└─ libraries/
    └─ chart.js
    └─ qrcode.min.js
    └─ html5-qrcode.min.js
```

Member 1 — Dashboard & Public Website

JS files

main.js

dashboard.js

profile.js

Firestore

firebase-config.js (shared setup)

Work:

- Dashboard statistics
- Chart.js
- Profile update
- Current user data
- Home page interactions

Reports: Basic reports aur charts Member 1 ke paas reh sakte hain agar team workload balance karna chahti hai.

Member 2 — Authentication & Library Management

JS files

auth.js

books.js

members.js

Firebase files

auth-service.js

books-service.js

members-service.js

Work:

- Login/Register
- Firebase Authentication
- Books CRUD
- Members CRUD
- Search and validation

Firebase setup: Member 2 shared firebase-config.js bana sakta hai, lekin wo sirf uska complete module nahi hai.

Member 3 — Transactions & Member Features

JS files

membership.js

scanner.js

issue.js

return.js

settings.js

Firebase files

borrow-service.js

notification-service.js

Work:

- Digital Membership Card
- QR generation
- Admin QR Scanner
- Issue Book
- Return Book
- Fine calculation
- Settings
- Member notifications

Workload warning

Member 3 ka module abhi bhi comparatively heavy ho sakta hai because QR Scanner + Issue/Return + Fine Calculation actual logic hain.

Best balance: Reports ko Member 1 ke paas rakho aur Member 3 ka QR scanner simple rakho. Notifications bhi basic list/read status tak rakho.
